## PROFESSIONAL EXPERIENCE

### Frontend Engineer

Aug 2022 - Jan 2024

#### Accelego Kreasi Digital

- Created, debugged, and maintained Accelego projects using ReactJs, Ant Design, and TailwindCSS.
- Developed and maintained projects with optimized codebases and well-structured folder systems to enhance website performance. Built project structures from scratch or continued development on existing projects.
- Adapted to various industry-specific needs, collaborating with team members to tailor solutions for different fields, providing exceptional client service, and aiming for positive feedback.
- Utilized a range of technologies beyond React, TailwindCSS, and Ant Design to meet client requirements, ensuring the use of the best tools for each project.
- Designed and implemented low-latency, high-availability, and performance applications. Created, developed, and researched features as necessary to meet project goals and client expectations.

### Frontend Engineer

Jan 2022 - Apr 2023

#### Inti Sinergi

- Created, debugged, and maintained Accelego projects using ReactJs, React Native, and SASS.
- Collaborated closely with frontend developers to create reusable and easily comprehensible components, streamlining the development process.
- Ensured the adherence to pixel-perfect design standards, meticulously translating UI/UX designs into website applications.
- Implemented a structured folder system and optimized codebase to bolster website performance and scalability.
- Actively contributed to the creation, development, and exploration of additional features as per project requirements.

### Fullstack Engineer

Nov - Dec 2021

#### Flash Mobile (MNC Financial Services)

- Built and implemented new features on web applications using ReactJs, NodeJs, and VueJs with Quasar Framework.
- Developed and maintained RESTful APIs using NodeJs and PostgreSQL as Databases.
- Worked with other teams to achieve project goals.
- Ensured the application ran according to the target without any bugs.

## SKILLS

### Programming Language

JavaScript, TypeScript, HTML, CSS, SASS

### Libraries & Frameworks

ReactJs, NextJs, React Native, VueJs, Google Maps API, Ant Design, TailwindCSS, Bootstrap, NodeJs, Express, PostgreSQL, Sequelize

### Tools & Platform

Git, Github, Bitbucket, Jira, Figma, Vercel, Netlify, Adobe Illustrator, Adobe Photoshop

## SELECTED PROJECTS

### Berulas (Becoming a full-stack app)

A platform for discovering product recommendations and guiding users to the right shopping destinations. Built using NextJs and TailwindCSS.

### fikrialfjri.xyz

Personal website built using NextJs and TailwindCSS

### EasyCooking

Helping people cook a variety of dishes from all over the world, this is my first personal project since completing the Hacktiv8 bootcamp in 2021. Built with ReactJS, Bootstrap, and TheMealDB API.

## EDUCATION & CERTIFICATION

### Graduated Fullstack Javascript

Hacktiv8 (IT Bootcamp)  
Jul - Oct 2021

### Social Science Major

SMAN 10 Jakarta (Public High School)  
2018 - 2021
